

The software development teams are going to present the final version of their projects on 9<sup>th</sup> of January. All the required outputs for the final version of your report are given below.

#### **For Agile Teams:**

1. UML Diagrams to define system model
  - a. Context Model (Fig. 5.1, Ch. 7.1),
  - b. Use-case diagrams and their detailed tables (Fig. 5.5, Fig. 7.2., Fig. 7.3.)
  - c. Class Diagrams (Ch. 5.3.1, Fig. 7.6)
  - d. Sequence diagrams for all the use cases (at most 5 major use cases) defined in 1.c.
  - e. State Diagrams (Ch. 5.4.2 and Fig. 5.17) for at least two classes or two subsystems.
2. Simple System Architecture Document which clearly explains the selected model and its advantages for the projects. Enrich your document with diagrams (Fig. 7.4)
3. Test reports
4. Is your project accessible to the potential users? Prove that. [Extra Credit +5 points]

#### **For Other Teams**

1. A well-defined and structured system requirements document
2. UML Diagrams to define system model
  - a. Context Model (Fig. 5.1, Ch. 7.1),
  - b. Use-case diagrams and their detailed tables (Fig. 5.5, Fig. 7.2., Fig. 7.3.)
  - c. Class Diagrams (Ch. 5.3.1, Fig. 7.6)
  - d. Sequence diagrams for all the use cases (at most 5 major use cases) defined in 1.c.
  - e. State Diagrams (Ch. 5.4.2 and Fig. 5.17) for all classes (at most 3)
3. Simple System Architecture Document which clearly explains the selected model and its advantages for the projects. Enrich your document with diagrams (Fig. 7.4)
4. Test reports
5. Is your project accessible to the potential users? Prove that [Extra Credit +5 points]

Each team will have only 20 minutes to demonstrate their projects and to answer our questions. All the team members must be ready on their evaluation period. Please make sure that you will have a working system on presentation.

#### **Important Dates**

Deadline to submit related documents: **07.01.2022 - 23.59**

Presentation of the projects: **09.01.2022 [9.30 – 16.30]**
